

# Rattapalz

*Pantigana zoperglava Susta*

The rattapalz is a great panteeganon with justizialist instincts. The particularity of this rat is that his tail is very big and very hard, like a great randel. The rattapalz uses this tail to give sazie lignade to all the animals, persons and things that ghe stà sule bale. One of the most rinomated colony of rattapalzs live in the Barcolan Riviera. This colony is formed by very nagana and tara rattapalzs, so bad and teeralonghi that all the cats stay away from this zone.

In the city of Triest the rattapalzs are so respected that the dialectal word for “randel” is “ratapalz”. The ratapalz became very famous with the stories of Druse Mirko, that was always ratapalzated, like in this quartine:

Gà ridudo come mati  
jornalisti che guardava  
e zò Frane per mia glava  
mi ga dà con ratapalz.

The Barcolan rattapalzs was even cited in these stories, in a quartine that unfortunately was never published for its cruel contents:

Mi po' Barcola jé andado  
una gatara là zigava  
tante onte la ciapava  
Jera pien di rattapalz!
